PROFESSIONAL SUMMARY

Data analyst with analytics engineering depth. Writes the SQL and Python that pull data from multiple systems, models it in dbt with tests, and delivers it in Power BI and Tableau. At IBM, replaced a multi-day manual reporting process with same-day automated delivery and presented dashboards to leadership across 6+ teams. Now responsible for data integrity on regulated pension and benefits records at an insurance company.

PROFESSIONAL EXPERIENCE

Data Analyst, IBM | New York, NY | Sep 2022 - May 2024

- Rebuilt a multi-day manual reporting process as an automated Python and SQL workflow, cutting delivery to same day and eliminating the recurring data inconsistencies the manual process introduced.
- Wrote and optimized SQL queries to extract, transform, and validate data from multiple source systems, feeding scheduled Power BI refreshes and tracing reporting discrepancies back to source data to resolve root causes.
- Designed and maintained Power BI and Tableau dashboards on operational data, presented to leadership across 6+ cross-functional teams.

Data Operations Specialist, Amalgamated Life Insurance Company | White Plains, NY | Sep 2025 - Present

- Validate and reconcile pension and benefits records across internal insurance systems, using V3 (our internal records platform) to query, verify, and correct them under compliance standards for regulated data.
- Identified a recurring documentation workflow running on repetitive manual entry and built the Excel macros and mail-merge templates that now automate its data entry, formatting, and reference-list maintenance.

PROJECTS

Healthcare Claims Analytics | Python, SQL, SQLite, Pandas, CMS DE-SynPUF, Tableau

- Merged inpatient, outpatient, and Part D claims for 116,000 synthetic Medicare beneficiaries (CMS DE-SynPUF, 2008-2010) into SQLite through a Python ETL pipeline, then analyzed cost drivers, 30-day readmissions, and comorbidity burden across 11 chronic conditions. Found that stroke adds roughly \$9,980 in annual spend despite affecting only 4% of patients, once other conditions are controlled for.

Economic Indicators Data Engineering Pipeline | Python, Apache Airflow, dbt, AWS S3, Streamlit

- Deployed a 5-stage ELT pipeline that refreshes 8 Federal Reserve series daily (FRED API, S3, Airflow, dbt, Streamlit). The recession-risk signal it feeds flags all 9 U.S. recessions since 1959 in backtesting (100% recall), with precision tuned from 45% to 56%.

Basketball Intelligence Platform | Python, dbt, DuckDB, Streamlit, Docker, nba_api

- Backfilled 47 seasons of NBA data (1.09 million player-game rows) into DuckDB, chosen over Postgres for fast analytical queries with no server to manage. Modeled it through a 5-model dbt staging layer covered by 13 passing data quality tests and served it in a 6-page Streamlit dashboard, containerized with Docker.

Portfolio Risk Analysis | Python, Streamlit, SQLite, Plotly, pytest, GitHub Actions

- Modeled portfolio risk (Sharpe, Sortino, Beta, VaR/CVaR, max drawdown) across up to 25 holdings from 10 years of prices in SQLite, adding a Dirichlet-sampled efficient frontier optimizer and a 1,000-path Monte Carlo simulation. Automated the daily price refresh on GitHub Actions and tested the app at three levels: unit tests, analytic-solution checks, and headless end-to-end runs.

Soccer Media Benchmarking | YouTube API, BigQuery, dbt, Streamlit

- Benchmarked 5 soccer media channels (BR Football, CBS Sports Golazo, The Athletic FC, Tifo, Copa90) using YouTube API data loaded into BigQuery, modeled in dbt, and served through a Streamlit dashboard.

SKILLS

Analytics and Reporting: SQL, Python (Pandas, NumPy), Excel (advanced, macros), Power BI, Tableau, Looker (familiar), statistical analysis, regression

Pipelines and Modeling: dbt (staging, intermediate, mart layers, testing), Apache Airflow, ETL/ELT design, API ingestion, data modeling, BigQuery (GCP), DuckDB, AWS S3, Docker, Snowflake (familiar)

Data Quality: Data validation, reconciliation, data quality testing, root-cause analysis

Workflow: Git/GitHub, GitHub Actions (scheduled jobs), Agile (Scrum), Jira, Claude Code (daily AI-assisted development)

EDUCATION

B.A. Computer Science, Minor in Mathematics | Hunter College (CUNY) | May 2025

Google Data Analytics Certificate | Google / Coursera | 2026
