

Ajaiah Darlington

Analytics Engineer | Data Analyst

ajaiahdarlington07@gmail.com | 347-205-7535 | [LinkedIn](#) | [Github](#)

PROFESSIONAL SUMMARY

Analytics engineer and data analyst with hands-on experience designing dbt-modeled data warehouses, orchestrating Airflow pipelines, and building Python ETL processes that move raw data through staging, transformation, and interactive dashboards. Applied project work spans healthcare claims analysis, quantitative finance, and sports analytics, built on BigQuery and DuckDB and delivered through Power BI, Tableau, and Streamlit. Uses Claude Code as a core part of a daily development workflow, and is motivated by building systems people can trust to make decisions.

PROFESSIONAL EXPERIENCE

Data Analyst

Sep 2022 – May 2024

IBM | New York, NY

- Automated an end-to-end reporting workflow using Python and SQL, reducing a multi-day manual process to same-day delivery and eliminating recurring data inconsistencies.
- Wrote and optimized SQL queries to extract, transform, and validate data from multiple source systems, building datasets that powered scheduled Power BI refreshes and tracing reporting discrepancies back to source data to resolve root causes.
- Designed and maintained Power BI dashboards translating complex operational datasets into clear, stakeholder-ready visualizations presented to leadership across **6+ cross-functional teams**.

Data Entry Specialist

Sep 2025 – Present

Amalgamated Life Insurance Company | White Plains, NY

- Performs systematic data reconciliation across regulated insurance databases, verifying and correcting pension and benefits records to maintain compliance and data integrity standards.
- Built Excel-based audit logs, reusable tracking templates, and macros that automate recurring document creation, standardizing data quality monitoring and reducing resolution turnaround time.

SKILLS

Core Tools: Python (Pandas, NumPy), SQL, Excel (advanced, macros), Power BI, Tableau, Looker

Analytics Engineering: dbt (staging, intermediate, mart layers, testing), Apache Airflow (DAG orchestration, retries, backoff), ETL/ELT pipeline design, data modeling, pytest

Cloud & Warehousing: BigQuery, GCP, DuckDB, AWS S3, Parquet, Docker, Snowflake (familiar)

Data Quality & Analysis: Data cleaning, outlier detection, validation, root-cause analysis, reconciliation, statistical analysis

ML & Modeling: Regression, unsupervised similarity modeling (cosine similarity), scikit-learn

Dev & AI Workflow: Git/GitHub, Agile (Scrum), Jira, Jupyter Notebooks, Claude Code (daily, primary AI-assisted development tool)

PROJECTS

Economic Indicators Data Engineering Pipeline | *Python, Apache Airflow, PySpark, Databricks, dbt, AWS S3, Streamlit*

- Designed a 5-stage data engineering pipeline (Airflow, S3, PySpark, dbt, Streamlit) delivering 6 live Federal Reserve economic indicators daily, orchestrating parallel ingestion with retry and exponential backoff logic, modeling a 3-layer dbt warehouse that computes a composite 0-6 economic stress signal, and deploying a dashboard with a 3-tier fallback data loader.

Basketball Intelligence Platform | *Python, dbt, DuckDB, Streamlit, Docker, nba_api*

- Built a local-first NBA analytics platform backfilling 47 seasons and 1.09 million player-game rows into a DuckDB warehouse, modeled by a 5-model dbt staging layer covering 13 passing data quality tests, and served through a 6-page Streamlit dashboard containerized with Docker for portable deployment.

Healthcare Claims Analytics | *Python, SQL, SQLite, Pandas, CMS DE-SynPUF, Tableau*

- Built an ETL pipeline loading 116,000 Medicare patient records across four CMS source files into SQLite, analyzed cost drivers by computing per-condition spending deltas to control for comorbidity (stroke, for example, adds roughly \$9,980 in annual spend despite affecting only 4% of patients), and exported 14 pre-aggregated tables to a Tableau Public dashboard.

EDUCATION

B.A. Computer Science, Minor in Mathematics | Hunter College (CUNY)

May 2025

A.A.S. in Information Systems | New York City College of Technology (CUNY)

May 2020

Google Data Analytics Certificate | Google / Coursera

2026

Financial Markets Certificate | Yale University / Coursera

2025
