## PROFESSIONAL SUMMARY

Data analyst with hands-on experience building Python ETL pipelines, writing complex SQL queries, developing Power BI and Tableau dashboards, and translating complex datasets into clear, actionable insights for cross-functional stakeholders. Brings a strong analytical foundation across **healthcare, financial, and sports analytics** domains, with applied project work in predictive modeling, data quality, and end-to-end pipeline development. Cloud-experienced in BigQuery and GCP, comfortable with the full data workflow from ingestion through visualization, and motivated by work that has a measurable impact.

## PROFESSIONAL EXPERIENCE

### Data Analyst

Sep 2022 – May 2024

IBM | New York, NY

- Automated an end-to-end reporting workflow using Python (Pandas, NumPy) and SQL, **reducing a multi-day manual process to same-day delivery** and eliminating data inconsistencies across **6+ cross-functional teams**.
- Wrote and optimized SQL queries to extract, transform, and validate data from multiple sources, building datasets that powered **scheduled Power BI dashboard refreshes** and removed the need for manual KPI collection.
- Conducted data quality checks and **root-cause analysis** on reporting discrepancies, tracing errors from dashboard outputs back to source data, resolving inconsistencies, and documenting fixes to prevent recurrence.
- Designed and maintained Power BI dashboards translating complex operational datasets into clear, stakeholder-ready visualizations **presented to leadership**, supporting faster and more informed decision-making.

### Data Entry Specialist (Contract)

Sep 2025 – Present

Amalgamated Life Insurance Company | White Plains, NY

- Performed systematic data reconciliation across **regulated insurance databases**, verifying and correcting pension and benefits records to maintain strict compliance and data integrity standards.
- Built Excel-based audit logs and reusable tracking templates to standardize data quality monitoring, **reducing resolution turnaround time** and creating a reproducible process for investigating and documenting discrepancies.
- Collaborated with team members to investigate data issues end-to-end, communicating findings and timelines to supervisors and ensuring full accountability for assigned records.

## SKILLS

**Core Tools:** Python (Pandas, NumPy), SQL, Excel (advanced), Power BI, Tableau, Looker

**Data Quality & Analysis:** Data Cleaning, Outlier Detection, Data Validation, Root-Cause Analysis, Reconciliation, Statistical Analysis

**Cloud & Engineering:** BigQuery, GCP, Snowflake, Azure, ETL Pipelines, Data Modeling, dbt, Airflow (basic)

**ML & Modeling:** Linear/Logistic Regression, Random Forest, XGBoost, LightGBM, KNN, SVM, Naive Bayes, K-Means, DBSCAN, Isolation Forest, PCA, Scikit-learn

**Dev & Workflows:** Git/GitHub, Agile (Scrum), Jira, Docker, Bash, Jupyter Notebooks, AI-assisted development tools

## PROJECTS

**Portfolio Risk Analysis Dashboard** | Python, SQL, Streamlit, Pandas, NumPy, Massive.com API, yfinance, SQLite

- Built a production-style interactive financial analytics application computing Sharpe ratio, Sortino ratio, Beta, Max Drawdown, VaR, and CVaR across up to 25 S&P 500 assets, with a Monte Carlo simulation rendering 2,500 portfolio weight combinations, a pairwise correlation heatmap, and an idempotent dual-source ingestion pipeline.

**Football Scouting Intelligence Pipeline and Dashboard** | Python, Pandas, SQL, BigQuery, FBref, Transfermarkt, Tableau

- Engineered an end-to-end Python data pipeline merging FBref and Transfermarkt data across 3,008 player-seasons using two-pass exact and fuzzy name matching at a 94.9% match rate, applied a composite scoring model with position-specific weights and league strength multipliers, and published results to Tableau Public.

## EDUCATION

**B.A. Computer Science, Minor in Mathematics** | Hunter College (CUNY)

May 2025

**Coursework:** Data Structures & Algorithms, Database Management, Data Mining, Machine Learning, Operating Systems

**A.A.S. in Information Systems** | New York City College of Technology (CUNY)

May 2020

**Google Data Analytics Certificate** | Google / Coursera

2026

**Financial Markets Certificate** | Yale University / Coursera

2025
